

Seals and Cuffs

A complete assortment of silicone and latex products for protective suits

Silicone

Silicone Seals are constructed from hypoallergenic silicone that have far better stretch and offer enhanced comfort compared to Latex Seals. Divers with latex allergies can dive carefree, knowing that the seals are non-allergenic. The seals are durable and resistant to degradation by UV light, ozone or chemicals. The elasticity makes donning the suit much easier and it seals with your skin more effectively. Since the pressure is lower on the wrists your hands will stay warmer.

- UV and Ozone resistant
- Far better stretch than latex
- No latex allergy
- Fits Modular Quick Change Solutions
- Easy donning and doffing
- Quick and Easy replacement
- Interior Glide Coating

Latex

Latex Seals are the most commonly used seals in the market today. Latex Seals offer enhanced strength compared to Silicone Seals but life span is shorter as it degrades from UV light, ozone or chemicals.

- Enhanced strength compared to Silicone Seals
- Fits Modular Quick Change Solutions
- Can be glued onto all fabrics
- Easy donning and doffing
